

NEW IMPROVED STYLE PANARELLO

The new improved panarello for the FrancisFrancis X1 iperespresso, X7 and X7.1 iperespresso fits to your steam wand in a slightly different way to the original push on unit. This is a much more secure fitting with a firmer connection, minimising the possibility of pressure making it shoot off.

Please follow these instructions:

You will find the unit unscrews and comprises of these five parts (1.Cap, 2.Hard Tube, 3.Soft Tube, 4.Injector, 5.Nozzle)

This is the bare steam wand

Slide the cap (1), the small hard tube (2) and then the soft rubber tube (3) onto the wand

Followed by the injector (4) - which screws into the cap nice and securely

Push the nozzle (5) in to place
